A liquid adhesive known as "tack coat" will be sprayed on the roadway ahead of the paving operation. Please avoid driving on or over the tack coat. It is a tar-based product that could potentially stain your driveway or vehicle. Caution should be used with pets and children, as freshly placed asphalt is extremely hot. Please follow instructions from on-site workers.

When asphalt is being laid, we ask that if you require use of your vehicle, that you remove it from your driveway by 7:00am. There will be times when access to your driveway will be restricted. For example, you will not be able to get in or out of your driveway when the Contractor is paving near or adjacent to your driveway. The typical length of driveway restriction is one working day per placement. Please plan accordingly.

We apologize for the inconvenience and appreciate your help to make this project a success. If you have any additional questions about this project please contact the City's Project Manager/Inspector. This information and other Frequently Asked Questions related to construction can be found on our Construction Projects page under City Hall/Environmental Services.
